Preface

The Health Behaviors of South Dakotans 2007 serves as a way to measure health risks of South Dakotans.

The information used to develop the report came from the Behavioral Risk Factor Surveillance System (BRFSS). The South Dakota Department of Health (SDDOH) initiates the BRFSS with the assistance of the Centers for Disease and Control and Prevention (CDC).

The survey consists of questions aimed at tracking and trending prevalence of health behaviors and conditions over time. The report also compares data from this survey to the *Healthy People 2010 National Health Objectives* as well as to the rest of the nation.

The BRFSS is the world's largest telephone survey. The survey is administered to households with individuals age 18 years or older.

The Office of Data, Statistics, and Vital Records edited and compiled data for this publication. This report contains as much information as practical from the survey.

Any questions regarding The Health Behaviors of South Dakotans 2007 should be addressed to:
